PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate from the Sri Lanka Institute of Information Technology (SLIIT) with experience in UI/UX design, frontend development, and full-stack software engineering. Skilled in React, JavaScript, .NET Core, Java, Python, Material UI, and Figma. Passionate about designing user-centered interfaces and building responsive, high-quality web applications while continuously learning new technologies.

WORK EXPERIENCE

UI/UX Designer Intern — Gamage Recruiters

Nov 2024 – May 2025

Sri Lanka (Remote)

- Designed user-centered interfaces for web and mobile applications across multiple real client projects, ensuring consistent and responsive user experiences from concept to final handoff.
- Collaborated closely with developers to translate design concepts into functional products, maintaining design consistency and usability throughout the development lifecycle.
- Created wireframes, prototypes, and high-fidelity mockups to communicate design solutions and iterate based on stakeholder and user feedback.

EDUCATION

Sri Lanka Institute of Information Technology — Sri Lanka

2022 – Present

B.Sc. (Hons) in Information Technology, Faculty of Computing

Rippon Girls' College — Galle, Sri Lanka

Dec 2020

GCE Advanced Level Examination — Physical Science Stream | 3 C Passes

Rippon Girls' College — Galle, Sri Lanka

Dec 2016

GCE Ordinary Level Examination | 6 A's, 1 B, 2 C's

TECHNICAL SKILLS

Programming Languages: Java, C++, C, Python, JavaScript, Kotlin, PHP

Web Technologies: HTML, CSS, Bootstrap, Node.js, React

Databases & Tools: MySQL, Figma, Git/GitHub

Soft Skills: Communication, Analytical Thinking, Time Management, Problem Solving

ACADEMIC PROJECTS

Transforming Financial Leasing with Machine Learning: Intelligent Risk Assessment and Predictive Analytics

(Final year research project)

- Developed an AI-powered financial leasing risk assessment platform as a final year research project.
- Built a machine learning-based default risk prediction module using XGBoost, LightGBM, and CatBoost.
- Contributed to full-stack web application development using React/Next.js and FastAPI with a Supabase backend.

Technologies: Python, XGBoost, LightGBM, CatBoost, Random Forest, Gradient Boosting, scikit-learn, React, Fast API, Next.js

LearnLink – Skill Sharing & Learning Platform

- Developed a full-stack learning platform connecting students and instructors.
- Implemented student management functionality using REST APIs.

Technologies: React, Spring Boot, Java, Material UI, MySQL, GitHub

Academic Scheduler System

- Designed and developed a student management and timetable scheduling system.
- Implemented student management features and automated timetable generation.

Technologies: React, Material UI, .NET Core web API ,Dapper

To-Do List Mobile Application

- Developed a task management mobile application enabling users to create, update, delete, and organize daily tasks, with SQLite integration for local data storage and a simple, intuitive user interface.

Technologies: Kotlin, SQLite, GitHub

Public Health Information System

- Developed a web-based public health management system to support maternal and child health record keeping, vaccination eligibility monitoring, and stock level updates.

Technologies: React.js, Express.js, Node.js, MongoDB

Online Bidding System

- Developed an online bidding platform with user-friendly features for buyers and administrators, including a Contact Us module for managing customer inquiries, feedback, and support requests.

Technologies: HTML, CSS, JavaScript, Bootstrap, Java Servlets, MySQL

Tic Tac Toe Mobile Game Application

- Developed a mobile Tic Tac Toe game featuring an interactive user interface, responsive gameplay, and multiplayer support, applying object-oriented programming concepts.

Technologies: Kotlin

Bake-N-Take Website UI Design

- Designed and redesigned the Bake-N-Take website user interface to improve usability, visual consistency, and the online ordering process.

Technologies: Figma
